

Automatic Backup

1. Iomega QuickSync3 software (\$40) <http://www.iomeaga.com/>
2. External 40GB hard drive. (\$150) Your preference for brand or size.
3. Optional USB hub to plug USB devices in. (\$40)
 - Install hard drive software & plug hard drive in.
 - Install QuickSync software and select all directories to backup. Select the option to backup files as saved. Multiple revisions can be saved.

Any file in any directory selected in QuikSync setup will backup to the external hard drive when saved to your PC.
